DETAILED ACTION

This action is in response to the election filed December 8, 2004. Applicant elected Group I, namely claims 1-6, and 9-25, without traverse. Claims 1-6, and 9-25 are pending. It is noted that the elected claims are properly classified in class 385 (optical waveguides), as all claims have the limiting language of "fiber-shape".

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on June 26, 2004 has been entered.

Election/Restrictions

This application is in condition for allowance except for the presence of claims 7, 8, 26, and 27, which were non-elected without traverse. Accordingly, claims 7, 8, 26, and 27 been cancelled.

Allowable Subject Matter

Claims 1-6, and 9-25 are allowed. The following is an examiner's statement of reasons for allowance: the relevant prior art of record does not teach or reasonably suggest a fiber shaped device for producing quantum effects in which control paths are physically connected to quantum dots within a material, and which these control paths actuate the quantum dots to form "artificial atoms". It is noted that the declaration of Mr. Robert Metzger, filed June 17, 2004, states that the arrangement of quantum dots with control paths can form these "artificial atoms".

Art Unit: 2874

The closest prior art of record (Stintz et al. US 2002/0114367, LoCasclo et al. US 2002/0041736) teaches fiber shaped materials in which quantum dots are optically coupled to the fiber/waveguide, but these quantum dots are not controlled by control paths to create "artificial atoms", but instead the quantum dots of the prior art of responding to an optical stimulus when light travels through the fiber/waveguide, and, in particular, are used for amplifying/laser means when stimulated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inventorship

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel J Petkovsek whose telephone number is (571) 272-2355. The examiner can normally be reached on M-F 8:30-5:00.

Application/Control Number: 09/964,927

Art Unit: 2874

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Rodney Bovernick can be reached on (571) 272-2344. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
